Covers any tire 200 pounds or less. This would include any semi-truck tire, whether it is a dump truck or over the road semi.

Rear Tractor tires- priced calculated using diameter in inches*cost per inch formula
See separate Tire Pricing 'Cheat Sheet' for details
Larger Quantities of Tires- see additional below

The above prices are the same prices charged by the Vernon County Solid Waste and Recycling Department to any Vernon County Resident for drop-off at the Vernon County Landfill.

If you have larger quantities of tires (5+) or tractor tires, it will be cheaper to haul directly to the Vernon County Landfill as they will charge by weight for 5+ tires and tractor tires. Current cost per ton at the landfill is $390.00. The Town of Clinton does not have a way to accurately weigh tires, therefore Residents will be charged by each tire's individual price.
